You will receive a call from your County Health Department regarding results. Please ensure that the call is answered. Due to privacy considerations, we are unable to leave specimen results over voicemail. Contact your County Health Department if you have not received your test results in 7 days.

If you receive a positive test result, follow the attached Isolation Protocol and contact your healthcare provider if symptoms worsen.

If you receive a negative test result it is possible that you were not infected at the time your specimen was collected. A negative test result does not guarantee that you will not get sick in the future. It is possible that your specimen was collected very early in your infection and that you could test positive later, or you could be exposed at a later time and develop the illness. If you develop any symptoms of COVID-19 (fever, cough, shortness of breath) remain home and follow the attached Isolation Protocol.

Common symptoms of COVID-19 include:
- Fever
- Cough
- Shortness of breath
- Altered sense of taste or smell

If you develop any of these symptoms, please contact your healthcare provider for advice. Call before visiting your healthcare provider to inform them that you have been tested for COVID-19.

Seek medical attention immediately if you develop any emergency warning signs for COVID-19. Emergency warning signs include but are not limited to:
- Difficulty breathing
- Persistent pressure or pain in chest
- New confusion or difficulty to arouse
- Blue discoloration of lips or face

For medical emergencies, contact 911 and notify dispatch personnel that you have been tested for COVID-19.
